distinctive

Board+Batten Designer Series™ in Everest
Board+Batten Designer Series™ delivers striking style in a vertical panel. Use it as the dominant exterior cladding or as an accent to highlight architectural features. Available in a broad range of colors, including new darker hues for a contemporary look, it never needs painting. Advanced engineering ensures superior impact resistance and outstanding durability in all weather conditions.
ENTRY WAYS
An inviting, rustic look can easily be achieved with Board + Batten Designer Series™ around entrances and deck areas.

GABLES
The combination of vertical lines and a darker, contemporary color emphasizes the A-shaped design of this home.
ARCHITECTURAL FEATURES
Use Board + Batten Designer Series™ to accent gables or peak areas. It adds contrast, curb appeal and helps increase the value of your home.

DORMERS
Board + Batten Designer Series™ highlights the vertical plane of this dormer, providing the perfect counterpoint to the angled roof lines.
THE EXTERIOR SOLUTION FOR Color.

Enhance your home's style with a palette ranging from traditional pastels and earth tones to darker contemporary colors. The choice is all yours.

Explore the possibilities.
With our visualizer tool, you can apply different combinations of colors and products to see how they look. Bring your vision to life at mastic.com/getstarted.
7” BOARD+BATTEN DESIGNER CHOICE DESIGN
New design and wider color choice combine to offer dramatic appeal.

PREMIUM .048 THICKNESS
Tough, impact-resistant and exceptionally durable panel.

ADVANCED LOCKING SYSTEM AND NAIL HEM

WIND SPEED — RATED UP TO 175 MPH

5-1/2” BOARD WITH 1-1/2” BATTEN

WOODGRAIN APPEARANCE
Authentic woodgrain appearance replicates the look of freshly painted wood.

HANG-TOUGH™ TECHNOLOGY
Exclusive formulation and process boosts durability so panels are more resistant to cracking, impact and thermal distortion. As an added benefit, rich color resides throughout the panel — virtually eliminating the appearance of nicks and minor surface scratches.

CLASS 1(A) FIRE RATING

V.I.P. LIMITED LIFETIME WARRANTY
Premium guarantee of lasting quality and peace of mind — backed by Mastic, a trusted industry leader for 50+ years (see warranty for complete details).

METRO-DADE COUNTY APPROVED
BOARD & BATTEN HAS BEEN GREEN APPROVED BY THE NAHB RESEARCH CENTER.
This means you can be assured that Board & Batten complies with specific green practice criteria in the National Green Building Standard. Visit www.GreenApprovedProducts.com for more details.

HANG-TOUGH™ TECHNOLOGY
Exclusive formulation and process boosts durability so panels are more resistant to cracking, impact and thermal distortion. As an added benefit, rich color resides throughout the panel — virtually eliminating the appearance of nicks and minor surface scratches.

BREATHE EASY
Unlike some fiber cement products, vinyl siding does not produce harmful silica dust — silica dust can cause lung disease.

TIME-TESTED. CERTIFIED. AND MORE.
Mastic vinyl siding products are certified through the Vinyl Siding Institute (VSI), which sponsors third-party certification to ensure vinyl siding quality. Mastic vinyl siding meets or exceeds ASTM D3679 performance standards for impact resistance, weatherability, product thickness and performance in extreme conditions — all requirements in the VSI certification program.*

V.I.P. LIMITED LIFETIME WARRANTY
Premium guarantee of lasting quality and peace of mind — backed by Mastic, a trusted industry leader for 50+ years. See warranty for complete details.

TEST OUR VINYL. WE DO. RIGOROUSLY. RELENTLESSLY.

OIL CAN TEST Siding panels are placed under heat strips and saturated to 120° — 140°F to make sure the siding doesn’t warp or buckle.

WEATHERING Color retention (resistance to fading) is tested by subjecting Mastic products to real-time weather conditions and accelerated UV testing. This ensures that Mastic products will hold up in the most extreme environmental conditions.

RIGIDITY Panels are designed and engineered to be more rigid so the siding remains straight on the wall.

COLOR READ TEST Using a spherical spectrophotometer, a 10,000 watt xenon flash tube bounces light off a siding panel. This information is then analyzed to determine if the color falls within accepted ranges for color consistency and match.

VERTICAL HEIGHT IMPACT TEST Measures the product’s durability and ability to resist impact forces — the result of proper thickness, formulation and impact modifiers.

GLOSS TEST A digital readout microgloss meter is used to scan siding to determine if its gloss falls within a target range. Gloss is important to the aesthetic appeal of the siding.

SAVINGS IN PAINTING COSTS OVER TIME
Based on an average-size home, repainting or staining can cost up to $6,000 every four years. Board+Batten never needs painting, caulking or patching because, unlike wood, it won’t crack, peel, rot or split.

Board+Batten delivers.

**DURABILITY.** If you’re looking for siding that is durable and low maintenance, and looks beautiful, Board+Batten siding is the ideal choice. Board+Batten will enhance your home’s appearance today — and for years to come.

**NO PAINT, NO STAIN, NO HASSLES.** Board+Batten, a premium panel, never needs paint or stain. Unlike real wood siding, it won’t crack, peel, flake or rot. Revolutionary technology like Mastic’s exclusive Hang-Tough™ maximizes the panel’s weatherability and delivers additional protection — and peace of mind — for your investment.

**COLOR AND TEXTURE.** Featuring a realistic wood grain, Board+Batten is available in 15 base colors.

**PEACE OF MIND THAT LASTS A LIFETIME.** Board+Batten is backed by the Mastic V.I.P. Limited Lifetime Warranty — a real warranty backed by a solid company. Mastic has been a trusted industry leader for more than 50 years. Please see our warranty for complete details.

Inspiration. Just like that.

Mastic gives you tools to bring your vision to life. Our Design Palettes by Mastic brochure illustrates how to coordinate color, texture and accessories in 16 variations. In The Designed Exterior Studio, our visualizer tool lets you mix and match colors and products to see how they look. Explore the possibilities at mastic.com/getstarted. Or go a step further and submit a photo of your home for a realistic view of a designed exterior on your house.

Ask your builder or remodeler how to get started. Or call 800-962-6973 to request a Design Palettes by Mastic brochure.
A HEALTHY RESPECT FOR THE PLANET — AND OUR CUSTOMERS.

Mastic Home Exteriors by Ply Gem can help you meet your sustainable building goals and earn points in leading green building certification programs. Our products offer features that positively contribute to sustainable practices, improved energy efficiency or lifecycle benefits of homes. All are important aspects of sustainable building and reflect Mastic’s contribution to the Ply Gem Enviro initiative.

For more information on how Mastic products can help you meet your sustainable building goals, refer to the Mastic Building to Make a Difference white paper available at mastic.com.

SUSTAINABLE RESOURCES:

- Mastic vinyl siding is manufactured from two abundant natural resources: salt (57%) and natural gas (43%).

- During the manufacturing process of our vinyl siding, all unused material is reclaimed and reused, creating one of the most efficiently-produced exterior claddings available today.

- The Structure Home Insulation System™ has been third-party verified and Green Circle certified to contribute towards achieving LEED® and NAHB credits, utilizing post-consumer and post-industrial recycled material.

- When installed and used properly, Mastic products never require paint or stain, which reduces VOCs released into the atmosphere.

- Mastic Performance Metals® have been third-party verified and Green Circle certified to contain a minimum of 67% recycled content.

- Ply Gem facilities reuse and recycle pallets and packaging material, reducing raw material needs and landfill use.

ENERGY EFFICIENCY:

- Vinyl siding requires less energy to manufacture per square foot than brick and mortar.

- Mastic vinyl siding is lighter weight per square than other cladding options, so it requires less fuel to transport. Less fuel used means less pollution.

- When correctly installed, the Structure Home Insulation System™ can reduce thermal bridging and help meet the requirements of an ENERGY STAR® Qualified new home. The Structure Home Insulation System™ in a Double 6" profile has an R-value of R-3.0 using the testing method ASTM C1363, as specified by the Federal Trade Commission.

- Mastic Performance Metals® V-Groove soffit and roof and eave vents support proper attic ventilation efforts, which moderates attic temperatures and improves a home’s energy efficiency. Mastic V-Groove metal soffit provides the most net free ventilation per linear foot of any aluminum soffit system.

LIFECYCLE BENEFITS OF HOMES:

- Mastic vinyl siding is durable and requires no site finish. Our Performance Metals® stand up to weather with virtually no maintenance. Our Designer Accents™ use thicker construction and a baked lacquer finish to ensure that they hold up season after season.

- When installed properly and under normal use, our products should never require painting or staining. They won’t crack, peel, blister, or rot.

- All of our Performance Metals® aluminum accessories are easily recyclable. In fact, at the end of its lifecycle in building applications, 100% of the aluminum can be recycled.
